Pesudocodes

Task 01:

Write a program that takes an input temperature in Celsius and classifies it as "Cold", "Moderate", or "Hot" based on the following conditions: Cold: Temperature $\leq 10^{\circ}\text{C}$
Moderate: $10^{\circ}\text{C} < \text{Temperature} \leq 25^{\circ}\text{C}$ Hot: Temperature $> 25^{\circ}\text{C}$.

Task 02:

Create a program that asks the user to input a number and then determines whether the number is even or odd. Print an appropriate message accordingly.

Task 03:

Create a program that takes an input number and determines whether it's positive, negative, or zero. Print the appropriate message accordingly.

Task 04:

Write a program that takes two numbers as input and prints the larger of the two numbers. If the numbers are equal, print a message indicating that they are equal.

Task 05:

Develop a program that takes a number representing a day of the week (1 for Monday, 2 for Tuesday, etc.) and prints the corresponding day's name. If an invalid number is entered, print an error message.

Task 06:

Create a program that asks the user for their age and then determines if they are eligible to vote. In most countries, the voting age is 18 or above.
