

AL-2001

Artificial Intelligence

Lab

Objectives:

- Data Scrapping

Note: Carefully read the following instructions (*Each instruction contains a weightage*)

1. First think about statement problems and then write your logic on Copy / Notebook.
2. Write **Your Name** and **Roll No** on your Paper/Sheet's first page.
3. **Do not copy from any source otherwise you will be penalized with negative marks.**
4. Complete your lab **within given Time Slot**.
5. Paste all your codes along with screenshots in a word file and renamed with your roll number.
6. Keep all your source files in your computer for verification. Do not overwrite a single source file for all programs.

Problems:

Fetch HTML Content:

- Choose a website assigned for your project with structured data.
- Use the **requests** library to fetch the HTML content of the chosen webpage.
- Print the HTML content.

HTML Parsing:

- Use BeautifulSoup to parse the HTML content.
- Extract and print the title of the webpage.
- Navigating HTML Structure:
- Navigate through the HTML structure to find and print a specific tag and its content (e.g., a paragraph or a list).

Extracting Data:

- Identify a specific data point you want to extract (e.g., all the links on the page, or a list of items).
- Use BeautifulSoup to extract and print that data.

You need to do your exercise within the given time.
